Dear Members of the En Banc,

Re: Case No. CID-CDO-2026-001 — Stow vs. Meta Platforms

I write to notify the Commission of two developments relevant to this matter.

1. Update to the CASE001 evidence website

The public website has been updated to include a section addressing the continuing reproducibility of the reported rule failure in Meta's AI system. It also provides a link to Elon Musk's public discussion of the potential consequences of forcing an AI system to accept mutually contradictory propositions.

The updated material is available at:

https://www.case001.org/

Musk's remarks are provided as context for the general AI safety issue. The evidence concerning the reported behaviour of Meta's system remains distinct and is documented separately in CASE001.

2. Refusal to receive legal documents

I also draw the Commission's attention to the latest attempt to deliver legal documents to Meta, which was marked:

"RTS Refused to Received" [sic]

The corporate agent identified himself as **John Ronquklo.**

I consider this incident relevant to the procedural history of the matter and wish to ensure that the Commission is aware of it alongside the continuing technical evidence.

I respectfully ask that these developments be noted. If a formal supplemental filing or any further procedural step is required for either matter to be considered as part of the case record, please advise me of the applicable procedure.

Yours faithfully,

Geoffrey Arthur Stow
Complainant
